TEAM 2H FINAL DASHBOARD

This report summarizes the Final Dashboard of the analysis of the two datasets: User Data and Opportunity Sign-Up and Completion Data utilized throughout this internship journey.

The Dashboard aligns with the week 3 report and deliverable which addressed the key questions the Dashboard design was meant to answer. Additionally, the feedback from the week 3 submission was incorporated into the Final Dashboard making the Dashboard mobile responsive.

The final part of this process was the presentation and recording. The presentation and recording are separately attached to the submission link including the team's individual reflective video.

In conclusion, this Dashboard design report was successfully completed through the collective effort and individual contribution of the entire team 2H.

The link to the Final Dashboard design can be found below:
